

# COMMANDER SERIES LOW PROFILE LIFT

## THE BEST OPTION FOR HEAVY LIFTING

At Deco Manufacturing Company, we understand the inconvenience of moving heavy loads. Without the right equipment, maneuvering massive items can be extremely difficult. And when not done properly, it can lead to serious injuries.

**THAT'S WHY  
WE DEVELOPED  
THE COMMANDER  
SERIES LOW  
PROFILE LIFT.**

### EFFECTIVE, EASY MANEUVERING

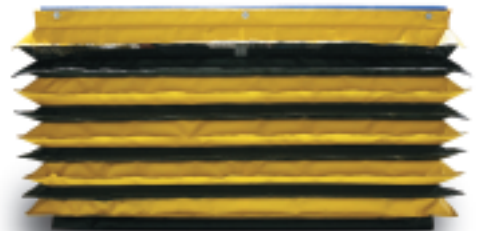

Available exclusively through Deco, the Commander Series Low Profile Lift allows you to effortlessly move up to 2,000 lbs. This convenient device ergonomically lifts a variety of applications, including lift containers, carts, and wide loads.

Plus, it features the lowest platform in its class. No equivalent lift system can match its ground-level lift capabilities.

### SUPERIOR OPTIONS

For your convenience, the Commander Series features lubed-for-life pivot points, foot-operated controls, and pressure relief valves.

We also offer a steel-reinforced safety skirt, up and down indexing, pedestal controls, floor-mounted tilt, a rotate deck, or a conveyor.

**Why try to move heavy equipment?  
Let Deco make it easy.**
